

Aristeidis Anastasopoulos

Struisenburgdwarsstraat 648, Rotterdam • Netherlands • aristidisanastasop@gmail.com • +31 6 1011 2139 • [LinkedIn](#)

EDUCATION

- 09/2025 – Ongoing **Erasmus University Rotterdam**, Netherlands
- MSc Economics and Business – Data Science and Marketing Analytics specialization
 - Grade: 7.9/10 (ongoing)
- 09/2018 - 09/2022 **Patras University of Economics and Business**, Patras, Greece
- BSc in Business Administration (4-year degree; 240 ECTS)
 - Grade: 7.51/10

PROFESSIONAL EXPERIENCE

- 07/2025 - Ongoing **Laboratory Analyst** (part time), SGS, Hoogvliet, Netherlands
- 12/2025 – 02/2026 **Case Study Researcher**, (Full time), UNICEF, The Hague, Netherlands
- Engineered composite features from donor survey data (Trust, Impact, Financial Capacity) and built an XGBoost model to predict NPS across 5,300 donors.
 - Identified 176 high-risk donors (3.3% of total) through segmentation; designed and tested 3 AI-simulated intervention strategies to predict impact on donor sentiment.
- 08/2023 – 07/2025 **Sales Agent**, June Homes, Athens, Greece. (US Real Estate Startup with over \$50million in funding)
- Guided 300+ applicants from initial inquiry to lease signing in the first year, consistently meeting and exceeding monthly targets.
 - Conducted virtual tours for properties located in Boston, MA, showcasing units to prospective clients.
 - Successfully guided over 300+ applicants from initial inquiry to lease signing in the first year.
 - Trained and onboarded 4 new agents.
- 11/2022 - 08/2023 **Mandatory Military Service**, Kos, Greece
- 07/2022 - 09/2022 **Business Analyst Intern**, Ideal Bikes (Bike manufacturing and exporting company), Patras, Greece
- Structured sales notes into weekly Excel reports, analysing product performance and in-store location vs. sales trends.
 - Cleaned and migrated data into Entersoft CRM/ERP system via CSV.

PROJECTS

1. **Academic Failure Prediction:** Built Random Forest classifiers in R to predict student failure risk (n=1,044), achieving balanced accuracy of 0.70 after threshold adjustment. Applied SHAP to identify key drivers of failure risk.
2. **MSc Thesis - Spotify Context-Switching Behavior (on-going):** Using Survival Analysis to model time-to-switch between Spotify listening contexts. Applying Hidden Markov Models to predict which context a listener switches to next.

3. **E-commerce Performance Dashboard:** Built a measurement framework in BigQuery and Looker Studio analyzing 257,000 website visitors across the holiday season, covering funnel drop-off, revenue by channel, product and country.
4. **Amazon Review Analysis & LLM Fine-tuning:** Benchmarked GPT-3.5 across zero, one, and few-shot prompting strategies for sentiment classification on 7,000 Amazon reviews, achieving 93.8% accuracy with zero-shot prompting. Fine-tuned BERT for the same task, reaching 83.0% accuracy and comparing performance across prompting approaches.

LANGUAGES

- **English** (fluent), **Greek** (native)
